**London 24/7 Commercial Gas Testing and Purging (IGEM/UP/1 and IGEM/UP/1A)**

Advanced Professional Plumbing & Heating are experienced commercial and industrial Gas Safe registered installers and can provide tightness testing, purging, commissioning and de-commissioning of gas pipework.

We have multiple sets of specialist gas purging equipment to ensure your gas purge is carried out efficiently and safely in accordance with current regulations.

## **London Emergency Commercial Gas Pipe Tightness Test & Purging Specialist**

### **We can assist all Domestic & Commercial Customers**

Various types of services are offered to all private and trade customers for example:

Landlords and tenants Overseas customers – in all countries who need sufficient service on the same day Customer from Surgeries, clinics, hospitals Customers in cinemas or theatres Hotel customers Restaurant customers Office customers Shopping mall customers Commercial building customers Customers in Colleges, universities or schools Wedding hall customers Factory customers Customers who work in shopping centres, superstores and all commercial

properties Senior citizen customers Charity customers Letting agent & Property maintenance customers Builders, carpenters, other contractor and trades customers Customers in museum Customers in building sites

### **Restaurant customers?**

You will need to have boiler serviced done yearly, get your commercial gas cooker repaired, your commercial grill or oven are not working you know who to call! Gas safety and electrical safety certificate are always important things for you especially when you have responsibility for your staff's safety as they need to be able to work safety. It's the owner's responsibility to get all your gas appliances, heating appliances, air-conditioning appliances, plumbing appliances checked over and make sure are. Our recommended gas safe plumbers (corgi) engineers are able to help with all this

And many more.....

### **Commercial Tightness Testing / Commercial Pipe Sizing**

Tightness testing is carried out to ensure that your gas pipework is safe for use. In a new gas pipework installation the test is to verify that pipework is gas tight.

On existing gas pipework installations, the test is to confirm that the pipework is gas tight.

A smell of gas or presence of gas detected would fail the test and would be required to be traced and repaired which ABC can also attend to.

We recommend that all gas pipework be tested on an annual basis. This can be carried out at the same time as the annual gas appliance service visit.

We also undertake all other gas services including new installations of central heating systems, planned preventative maintenance and also repairs of boilers, both domestic and commercial.
