"Finalist of the "Best New Business" and "Entrepreneur of the year" Kingston Business Awards 2010"

Certificate in Inspection, Testing and Verification of Electrical Installations OR **Portable Appliance Testing**

(commonly known as

PAT

or

PAT Inspection

or

PAT Testing

) is a process in the United Kingdom, New Zealand and Australia by which electrical appliances are routinely checked for safety. The correct term for the whole process is

In-service Inspection & Testing of Electrical Equipment

. When people work with electrical appliances,

[health and safety](#)

regulations state that the appliance must be safe, to prevent harm to the workers. Many types of equipment require testing at regular intervals to ensure continual safety; the interval between tests depending on both the type of appliance and the environment it is used in.

Evidence of testing is clearly visible to workers in the form of 'Passed' , 'Tested For Electrical Safety' and 'DO NOT USE after' labels affixed to various parts of the electrical equipment they use.

Having PAT electrical testing done by professional NICEIC electricians like us

This can be done by hiring an external company like Advanced Electrical Services to test all the electrical products in a business or it can be done in-house by someone who has had some PAT training, either by an official qualification or by attending a health and safety course offered by some electrical health and safety companies.

The following steps are taken when testing a business' electrical equipment.

Finding a trustworthy electrical company who is fully skilled and registered is not easy. Especially, in a capital city like London! You may be one of people who has had experienced very big let down by some electricians. At Advanced Professional Electrical Services you won't experience this and you will always be kept happy with the services we provide

Are you looking for the most professional & reliable local electricians in London? If you are, Advanced Professional Electrical Services is your best choice we have local electrician, local electrical contractor who can help you with all emergency and non emergency electrical services all over London and surrounding areas 24 hours.

Our NICEIC emergency electricians who deal with all home electrical repair and installation as well as construction electrical services (commercial and domestic electricians)

They are specialised in all issues along side with emergency electrical response for any electrical service you may need for example :

Electric oven repair – Some people may just call an electrician to fix their oven. Some may call a gas safe (corgi engineer) to have a look at your oven. Can we deal with it? Yes, we can deal with it. When we attend side we will be able to see if there is any problem with electric side (wiring fault or so). If it's the case we can just send an electrician to you and deal with whatever needed to be done. If it's not our gas safe (corgi) can also sort it out for you no problems.

Apart from that our electricians can also deal with electrical issue on oven stoves, commercial electric oven, electric cooker, electric light switch, electric shower repair, electric power shower. They have high skills, knowledge to repair electric on any appliance make such as thermostatic electric shower, Triton electric showers, Mira shower pumps, Mira shower valves, triton shower mixer, Qualisa and so on.
