## About Fireplaces

There are many consumers today who are converting wood burning fireplaces to gas fireplaces because gas fireplaces are convenient and affordable. Instead of going through the practice of burning wood, buying wood and cleaning out ashes, the only thing that needs to be done with a gas fireplace is to press a button to get the warmth desired instantly. Natural gas fireplaces have a natural real affect to them. Natural gas fireplaces provide the consumer with the feeling of having a wood burning fireplace. In addition, gas fireplaces use natural gas. Therefore, consumers do not have to lose sleep about pollution and/or other environmental troubles. Today, natural gas fireplaces are installed in new homes throughout many parts of the house. Some of the rooms where gas fireplaces are installed include bedrooms, kitchens, bathrooms and in other parts of the home

**Advanced Plumbing & Heating Gas Safe (corgi) engineers can help you with any gas issue. They can install, replace and repair gas/electric fires and deal with other gas problems**
