

Recommended 24Hour Power Flushing Service Power Flush Marylebone, Warwick Avenue, Hanger Lane, Isleworth 24 Hour Recommended Plumbers West Brompton, Kingsbury, Willesden, Neasden, Regent's Park Kensington, Lloyd's of London, Fenchurch Street, Strawberry Hill

The power flushing pump is simply connected into the heating system, either across standard circulator pump couplings, across the tails of one radiator, or wherever most practicable. The powerful flow, combined with instantaneous flow reverser device, will dislodge and mobilise deposits and corrosion which resist traditional system cleaning methods.

About the power flush system

The power flushing pump is simply connected into the heating system, either across standard circulator pump couplings, across the tails of one radiator, or wherever most practicable. The powerful flow, combined with instantaneous flow reverser device, will dislodge and mobilise deposits and corrosion which resist traditional system cleaning methods.

Our trained power flush engineers / plumbers can carry out the work for you

Existing debris is often mobilised by alterations to the system/piping and the increased efficiency of the new boiler, and may then accumulate in the boiler heat exchanger, causing noisy operation, reduced efficiency and, in extreme circumstances, failure of the boiler. The high efficiency and compactness of modern boilers, developed to minimise fuel costs and pollution, means that they are more susceptible to problems caused by debris in the system water.

Once the corrosion and sludge deposits have been loosened and mobilised, fresh clean water is forced through the heating system, pushing the contaminated water out through a full bore dump valve to waste. During the process, radiators are individually flushed, without removing or disconnecting them from the system, by directing the full output of the pump through each radiator separately.

Advanced Plumbing and Heating Services London can supply and carry out a power flush to your system, that comes with a warranty; Advanced Plumbing & Heating Services also uses the best machine and chemical to assure you get quality service from us - ask for details!
